## PROJECTS

**Automate Business Processes for a Recruiting App :**  
Created an processes in an HR recruiting app that streamline workflow for creating interviewer records and approving new positions. So we have created a flow for the app to simplify the process of rating candidates and make the rating process consistent.After that created an approval process to automate recruiting tasks by creating a process that automatically submits new positions for approval.

**Extra Mile: Configure a Solar Energy Bundle with Salesforce CPQ :**  
Created a configurable bundle for a solar energy system which organize the solar bundle options using features. Then capture solar bundle details with configuration and global attributes and validate correct solar bundle configurations with product rules.
